DETAILED ACTION

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 1, 20, 32 and 40:

Please see applicant's arguments dated 01 September 2006.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nierlich et al. (USPUB 2003/0158632) teaches a system and method for monitoring and controlling energy distribution, Snevely (USPUB 2003/0115024) teaches designing a data center and Buyya teaches a economic-based distributed resource management and scheduling for grid computing. Buyya seems to be the closest prior art of record however this reference does not appear to energy coefficients based on performance and supply heat indexes.
